Telephone Cullar Bulletin Business Office, 486. Bulletin Editorial Rooms, 25-3. Bulletin Job Office, 25-6. Office, Room Building. Telephone. 310. Norwich, Thursday, Nev. 4, 1909.

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 5,000 of the 4,053 houses in Norwich, and read by ninety-three per cent of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100, and in all of these places it is considered the local daily.

Eastern Connecticut has forty nine towns, one hundred and sixtyfive post office districts and fortyone rural free delivery routes. The Bulletin is sold in every

town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

THE AUTOMOBILE CENSUS.

Massachusetts has found it neces sary to take a census of all automo biles and horse-drawn-vehicles passing over the good roads of that state, to for, and the second week's count made for the week following October 10 is

37,591 horse-drawn vehicles to 27,399 automobiles. In the October count cles and 18,500 automobiles of all kinds. The percentages changed from 58 of teams to 42 of automobiles in August, to 65 of teams and 35 of nu-tomobiles in the month just closed. jority, there were almost three times as many touring cars as runabouts that he will be able to

This is a cational way of getting at the real amount of damage done to the reads by automobiles, and of correctly estimating what their share of the damage is. Qther states will probably follow suit in thus getting at a just assessment for the automobile

ELECTRIFIED HAMS.

A public which has become accusready for hams cured by electricity or by any other rapid way. It is not claimed that the electric fluid is used that the average campaign orator is no as it is when employed in tanning worse than a wheezy graphophone. leather, as that might make the hams too tough, but it works, a Cleveland man says, and works economically, He originated this method of quick smile at the fellow who got there. bers of the American Meat Packers' tion at Chicago, that a ham which he cured by the electric process three and a half years ago is as good now as the day it received its electric bath. The hams are placed in a large sip about vat filled with a pickle composed of sugar, salt and saltpetre, and an electric current is passed through the vat. The process is cheaper as well as quicker than the old way.

There will not be any objection to the process if it does not make the hams less digestible than the slower

OCTOBER RECORD.

The reports from Boston show that with respect to temperature October was normal; and this is a surprise to most of us; but in moisture it was one have deserved to be. of the driest of the dry months. The weather bureau's official metereological ern Connecticut readers: The mean was 52 degrees, and that

is the October mean for the last thirand once, in 1879, five degrees higher, but perhaps as few extremes are shown as for any month in the year. The highest figures for the month were 77 degrees, and the lowest 33 degrees, while the absolute maximum for the basic period has been 90 degrees and the absolute minimum 25 degrees. The accumulated excess since the beginning of the year is 357 described. In precipitation the previous deficiency has been intensified. Only 1.07 inches fell, against the thirty-nine-year average of 3.56 inches. While rain has been sorely needed, its lack has perhaps been borne with more resignation from the fact that the ment. hanced thereby. Eleven years ago over seven inches of rain fell during the month, conditions under which foliage could not be expected to for so n show its best. The accumulated effi- abouts. lency since January 1 is 1.94 inches. The prevailing direction of the wind has been west, and its total movehas been west, and its total move-ment 7,414 miles, its greatest velocity being at the rate of thirty miles an hour and the average ten miles. There were twelve clear days, twelve party were twelve clear days, twelve party cloudy and seven cloudy. On the 20th the first killing frost occurred. The mean atmospheric pressure was 30.01, the highest 30.51, and the lowest 29.64."

Lady Cooke says that man can do enything he wants to do; but Dr. ok doesn't want to re-climb Mt. McKinley; but he has get to, or be

They grow seven hundred bushels of potatoes to the acre out in Mon-

It becomes all men to think as well as possible of their brethren, for the worst are not utterly worthless, and the good are not so good that they

cannot be better. A Baltimore minister is reported to have said that life has become so meaningless and useless to some that it would be a good thing to provide for them a penny-in-the-slot machine which would kill them easily and re-

spectably.

This is not a plous thought, and The Bulletin questions whether it is really a creditable thought for even one of the condemned. There is not an element of charity in this sentiment, but there appears to be a warp of fiendishness. The assumption that there is a class so ambitious to kill themselves that they would volun-tarily invite death by dropping a penny in the slot has no grounds to rest upon; and the presumption that such a suicide would be respectable is wholly unwarranted. Men who desire to dominate their brethren often show by such loose remarks that they are not fit to control men since they cannot control themselves.

AN OPTIMISTIC VIEW.

President Mellen of the Consoli-dated road never lets his burdens dated road never lets his burdens blight his good cheer. He has faith in the immediate future of business and does not share the gloom of some of the stockholders. He is in a position to forecast prospects and he hestitates not to affirm that he believes the 8 per cent. dividend is probable in the future in spite of recent large loans. His words of assurance are as loans. His words of assurance are as tower.

"There need be no apprehension, I believe, that the dividend is now more secure than at any time since I came to the property. If the company is handled in the future as it has been in the past, stockholders need not be in doubt whatsoever regarding the future of the New Haven dividend unless there should come a panic regarding dividends. I think we will earn our dividends and replace the surplus which has been drawn upon uring the past two years, if conditions continue to improve, and I be-

President Mellen points out that faith in the future is the keystone of Unwarranted fear always produces disastrous results. As a great corporation without serious cometition the Consolidated certainly has a most promising outlook.

Tammany's victory in New York on Tuesday was not a complete and satdetermine what proportion of the isfying success. When it was revealed wear and tear each is accountable that the fusionists had captured the board of estimate and apportionment, Tammany must have had a chillmust have realized that its grip upon the revenue was lost. The win-22, and the count was made from 240 ning of the district attorney by the stations. For that week there were fusionists by 13,000 plurality must be fusionists by 13,606 plurality must be a thorn in the side of Tammany hall. Just what Mayor Gaynor may accomwere found 24,423 horse-drawn vehi- plish for his party is not discernible -whether his greatest achievement is to be in promoting or balking public affairs remains to be seen. Tammayoralty at all hazards, that it was While the single-horse, light and prodded at two most vitals points, heavy vehicles, were in a large ma- After all that has been said of Gaynor's imperfections, it is to be hoped for the honor of himself and party.

Use for Refrigerator.

When ice is no longer needed clean the refrigerator, stop the drainage pipe and dry the interior with a light-ed lamp. It is moisture that rusts the ed lamp. It is moisture that rusts the inside, so place no steaming articles in the refrigerator. If it is necessary to make an improvised cupboard out of it, it should be used for holding fruit in cans, jars and bottles. If the interior is in bad condition, now is the time of year to give it the usual three thin coats of white enamel paint. The first two of these should be allowed to dry thoroughly for a few days Secretary Nagel is a man who cannot be dallied with. He discovers administrative irregularities and promptly punishes those concerned.

Uncle Sam's children are bent upon cheating him every day; but Loeb is convincing them that it is a danger of the sam outlet into the yard the refrese and yard the yard the

easily. Peel and slice crosswise into pieces about one-quarter of an inch thick. Put into boiling sugar-sirup flavored either with lemon or sliced ginger-root. Cook until the carrots can be pierced easily with a fork. Pack in jars and seal. For the sirup use three-fourths of a pint of sugar to a pint of earrots and an ounce of ginger root to one-half gallon of sirup.

> WHY YOUR BOY DOES NOT LIKE SCHOOL.

When a boy won't go to school there is something wrong, and the parents should get at the very bottom of the trouble. All boys heartly dislike some Girls are not lacking in this respect.

Girls are not lacking in this respect, but they are really more ambitious students, taken collectively, and go to school much longer than boys.

One teacher offers this explanation for the boys 'refusal to go to school: They get behind in the class, have little ambition to get ahead, and do not care to be placed in a lower class.

The second fault is that they want to earn money.

Now when a boy falls at school he must be encouraged. If his teacher insists that be be demoted the boy should

be urged to accept this plan as the only method of regaining what he has lost. If it is money he wants, he should be given an opposiunity to work on Sat-

ardays.

Don't take the boy from school simply because he wants to leave.

Don't scoid the boy who fails; encourage him to do better work. Possibly he dislikes grammar—most boys do. He may, however, be an expert in arithmetic, for usually the boys are mathematicians.

do. He may however, be an expert in arithmetic, for usually the boys are good mathematicians.

Remember that where brilliancy is shown in one direction, wholesome dislike for another study may place the boy in a bad light. But that is no proof that the boy is not bright nor worth pushing ahead. His one best study may be the foundation for his future work. future work.

The students who graduate with the

highest average do not necessarily be-come the men and women who fill the highest positions.

The uneducated person is so sadly The uneducated person is so sadly handleapped in the business world that

if he does succeed it is only through years of untiring effort

WHISK IS "FIRST AID" IN HOUSEKEEPING.

Though its versatility is not generally recognized, the whisk is able to fill as many roles as the member of the old-fashioned stock company.

For instance, if slipped into a clean hag of cheesecloth it is invaluable in cleaning the corner of uncarpeted stons.

A clean one will lighten the labori-ous task of sprinkling clothes or fron-ing if dipped in water and shaken over the clothes.

An old one will prove more efficient than any other sort of brush in clean-ing all the nooks and crannies of the sinc.

It is absolutely necessary in the weekly brushing of mattresses.

No substitute can be found for it in the dusting of upholstery.

A special one will be found very convenient in order to reach corners inaccessible to the more unwields.

naccessible to the more unwieldy

WOMAN ONION GROWER.

A most successful onion grower, by the way, is a woman. Mrs. E. C. Dodd, who lives in Laredo, Tex., has culti-vated 135 acres this season and made tle over \$50,000. To make land bring a gain of over \$400 an acre is some-thing few men have the ability to do, and yet this woman does not seem to regard her feat as entitling her to

ny great praise.

Mrs. Dodd looks after every detail of her farm in person. Raising onions is no child's play. It involves hard work and great expense in that section, where irrigation is necessary. It is the intention of Mrs. Dodd to plant on a still bigger scale, as she gradually brings more of her land under irriga-

GUIMPES.

The guimpe occupies an important place in the bedice of this season's trest. It is in the range of the ordi-ary parson's vision and must fit well, besides offering a decorative spot in

besides offering a decorative spot in the bodice.

The finy yokes, which sometimes seem to be merely an extension of the collar, are frequently made of net, braided in designs that exploit soutable and rat-tail by the yard. Jet is used on black, appearing in lines or heavily embroidered. Many net foundations have chain stitching in colors; in other guimpes a solid design in dult shades, with penhaps one brilliam note giver richness to the foundation. One pentitful guimpes of a gown has a foundation of gray net upon which are emiare appliqued and the effect is a hand-some combination, which, by the way, can be made at home by any cleve:

werran.

Time and energy used in fastilening your guinne will add considerably to an otherwise plain freek.

Apples and Rice.

Take eight good sized apples, three embroidered solid or in outline with silk or mercerized cotion. The scalloped edge is buttonholed closely and the case sews up on the sides to form a procest for the cuffs.

Price of pattern, 10 cents.

Order through The Bulletin Company Pattern Dept. Norwich. Cong. ounces of butter, the rind of bulf a them into a stew pan with the butter and strew sufficient stuffed sugar over to sweeten them nicely. Then add the mincel lemon peel. Stew the apples year gently until tender, aking care they do not break. Boll the rice with

Have two quarts of water boiling in a kettle and one-third of a pound of spaghetti. Hold a few pieces of the spaghetti at a time in the water, and as the ends soften turn them round and round and down into the kettle. When all are in the water put on a cover and cook the spaghetti 20 min-utes, then drain.

utes, then drain.

Make a cream sauce with a rounding tablespoon each of flour and butter and one ounce of cream, Season with one-half level teaspoon of sait and a few grains of pepper. Stir in the spaghetti cut in inch piece, turn on to a dish and sprinkle with finely grated opense.

Avoid Wiry Material.

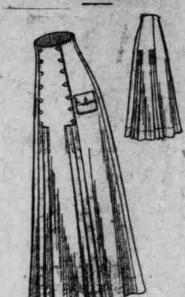

Do not buy pully or wiry materials if you are not versed in cutting: it is almost impossible for the novice to make a satisfactory garment of stiff mohair or poor, thin silk, and it is unwise to try broad stripes.

New Hair Dressing. Many of the very newest styles of dressing the hair entirely conceal the ears. These are invariably the modes which include the center parting.
